

# The World's Most Comprehensive METALS Database

Trusted in more than 160 countries  
[www.keytometals.com](http://www.keytometals.com)

## comprehensive

- 4,500,000 metal property records and 175,000 material designations from all major organizations and industrial associations
- Chemical composition, standard reference, application guidelines, mechanical properties, heat treatment details, properties at elevated temperatures, fatigue properties, and more
- Tables with equivalent materials worldwide and applied artificial intelligence within SmartCross™ module for cross-referencing
- The only true multilingual platform, available in 19 languages, providing you the power and competence for conducting global business

## accurate

- KEY to METALS is a “must-have” for anyone who researches, specifies or sources metals and wants to improve accuracy with less effort
- Geared to help engineers, designers, researchers, developers, marketers, manufacturers, maintenance specialists, purchasing specialists, college faculty and more
- Use KEY to METALS to search for metal alloys, and their properties, from around the world in seconds with easy text-based searches
- Identify unknown materials by their composition and properties

## easy to use

- Trade in your piles of manuals costing you thousands, for a single database subscription costing \$700 or less
- Replace hours of tedious research with a few clicks on the keyboard
- Let our staff of experts do the checking and updating for you
- Quality you can trust
- The only certified Database in the industry
- Sign Up for KEY to METALS Today!
- Materials Information trusted by Industry Leaders Worldwide

## Groups and enterprises, large and small MULTI-USER LICENSING

Multi-user licensing for KEY to METALS Web Edition is the most convenient and cost-effective solution for groups small and large, offices and enterprises.

- Your turn-key, always up-to-date, exceptionally affordable resource.
- Annual cost per user starting at \$48/€32.
- Contact us for additional information about multiuser licensing plans.

### Industry Leaders Worldwide Rely on KEY to METALS

#### MANUFACTURERS

ABB, Alcatel, Alstom, Apple, ArcelorMittal, Bao Steel, Benteler, Bentley, Black&Decker, Bosch, BP, ConocoPhillips, ChevronTexaco, Cummins, Dana, Danieli, Daimler, Delphi, Ford, General Electric, General Dynamics, Halliburton, Hitachi Metals, Honda, Hyundai, IKEA, INA, Maxtor, MAN, Pirelli, Shell, Siemens, SKF, SSAB, Toyota, TRW, Thyssen-Krupp, Total, Volvo, VW

#### STANDARDIZATION BODIES

Finnish Standardization Organization, Indian Standards Bureau, Korean Standardization Organization, Livermore National Laboratory, Lloyds, SGS, TÜV

#### EDUCATIONAL INSTITUTIONS

Aarhus University, Lehigh University, Stanford University, University of Bologna, University of Florence

## KEY to METALS not only saves time, it saves money.

Our subscribers tell us it "pays for itself" in as little as one week. Comprehensive, accurate, and easy to use; three simple reasons why customers rely on KEY to METALS.

- Assurance that the information you get is up-to-date and accurate, and is certified by international organizations.
- The most robust updated policy in the industry where new materials are added every month.
- Free knowledge base of metal related articles provides unique insights.

KEY to METALS Database fulfils completely my company's requirements and it can be considered as an excellent investment.

*Massimo Lucchetti  
RIMA SpA, Brescia, Italia*

I doubt if anyone could even begin to appreciate all of the time, energy and research that you've put into this system, until they have actually started going through it and using it. Even your free demo programs are very comprehensive and provide really valuable info. Thanks again and please keep up the excellent work.

*Dr Alexander Sedmak  
Drexel University, Philadelphia, USA*

### The only METALS DATABASE with Top International Certification

The KEY to METALS Database contains information that is completely accurate, easy to cross reference and search, and is built on a highly reliable platform, at your service, when you need it.

Our company quality processes, customer service, and product development procedures meet or exceed ISO 9001:2008 standards – the first and only in the metal properties information business.
